

## Disability Advocacy Coalition in Medicine (DAC Med) Core Committees

### Education Committee

- Engages in curriculum review to enhance coverage of disability in healthcare education
- Works to include disability accommodation tools, training modules, and guides in student resources

### Programming Committee

- Plans panels, lunch talks, film viewings, and trainings
- Ensures accessibility of all programming

### National Network Committee

- Plans participation and attendance national summit of trainees by connecting with medical student and health sciences organizations that exist at other institutions

## Research Engagement Committee

- Connects with institutional faculty engaging in disability research across disciplines, creates a database for collaborations with Northwestern centers and students
- Engages in a DAC Med research project on disability

## Community Outreach Committee

- Identifies community organizations students can work with on short and long-term projects and maintains database with opportunities
- Alerts students of Chicagoland advocacy opportunities at the intersection of medicine and disability
- Builds a DACMed advocacy project and partnership with a community group

## Peer Support Committee

- Creates a database of faculty who can engage in a disability support and mentorship program (start Fall 2021) with student mentees
- Works with administration to ensure curricular accessibility and support to all health sciences students
- Partners with Education Committee on building student resources

## \*\*Graduate Medical Committee

- Participates in programming events that address the culture of disability beyond the student level
- Engages in mentorship of health sciences students
- Serves as liaisons to engage residents and fellows in conversations on disability advocacy
